WHAT'S INCLUDED IN YOUR BOX?

HOW TO SET UP YOUR ROUTER

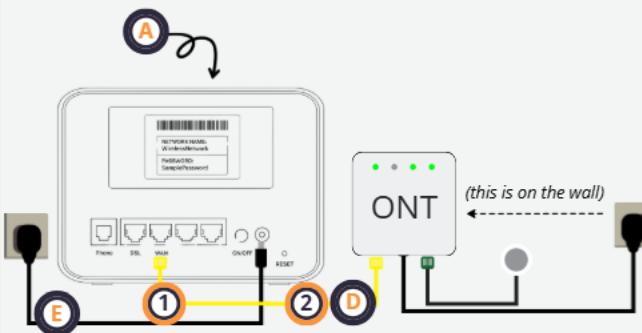

You can find out which connection type you have on your welcome email from us.

Your new broadband connection will be either:

- FTTP
- FTTC
- SOGEA
- ADSL

Option 1: Connecting to FTTP (Picture 1)

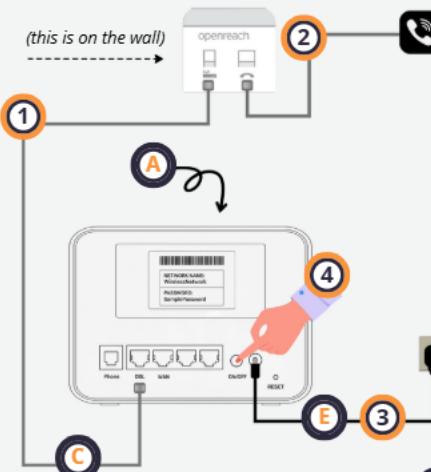

- ① Plug the Ethernet cable (D) into the port labelled WAN.
- ② Plug the other end of the Ethernet cable (D) into port 1 on the box attached to the wall.

Picture 1

Option 2: Connecting to ADSL, FTTC, SOGEA (Picture 2)

- ① Connect one end of the grey DSL cable (C) into the Master socket (it should say Openreach). Connect the other end of the cable into the grey (DSL) port on the back of your router (A).
- ② If you are using a house phone, connect this to the Openreach master socket as well. If you've ordered a digital calls package (VoIP) please follow the guide we've emailed you.
- ③ Plug the power cable (E) into your router and the mains.
- ④ Press the router 'on' button. The power light will come on with others following depending on your connection type. Please allow 10 minutes for the router to fully power up for the first time.

Picture 2

Connecting to WiFi (Picture 3)

- ① Find the Network name and wireless password (located on the sticker on your router).
- ② Search for available wireless networks on your chosen device and select the one that matches the router sticker.
- ③ When prompted for the password, enter the password on the sticker and connect.
