

HOW TO SET UP YOUR PHONE

Begin with the router setup (see overleaf), then move on to this step.

Option 1: Standard connection

- 1 Plug your phone cable into the "Phone 1" port on the back of your router (A) (usually green and on the far left). If there are multiple ports, always use the first one.

Option 2: Using a handset with a BT Phone Socket

- 1 Plug your phone cable into the VoIP adapter cable (F).
- 2 Plug the adapter into the "Phone 1" port on the back of your router (A) (usually green port on the far left).

WHAT'S INCLUDED IN YOUR BOX?

Your broadband router

A microfilter
Unless UltrafastFibre

DSL cable
(grey)

Ethernet cable
(yellow or white
with yellow ends)

The power cable

Voip adapter

Picture 1

Option 2: Connecting to ADSL, FTTC, SOGEA (Picture 2)

- 1 Connect one end of the grey DSL cable (C) into the Master socket (it should say Openreach). Connect the other end of the cable into the grey (DSL) port on the back of your router (A).
- 2 If you are using a house phone, connect this to the Openreach master socket as well. If you've ordered a digital calls package (VoIP) please follow the guide we've emailed you.
- 3 Plug the power cable (E) into your router and the mains.
- 4 Press the router 'on' button. The power light will come on with others following depending on your connection type. Please allow 10 minutes for the router to fully power up for the first time.

HOW TO SET UP YOUR ROUTER

You can find out which connection type you have on your welcome email from us.

Your new broadband connection will be either:

- FTTP
- FTTC
- SOGEA
- ADSL

Option 1: Connecting to FTTP (Picture 1)

- 1 Plug the Ethernet cable (D) into the port labelled WAN.
- 2 Plug the other end of the Ethernet cable (D) into port 1 on the box attached to the wall.

Picture 2

Connecting to WiFi (Picture 3)

- 1 Find the Network name and wireless password (located on the sticker on your router).
- 2 Search for available wireless networks on your chosen device and select the one that matches the router sticker.
- 3 When prompted for the password, enter the password on the sticker and connect.
